

TCS HOBS™ for Fiber Operations and Monetization

The growing demand for full-fiber access is attributed to some critical factors. The pandemic was one of the most significant drivers that accelerated the need for high-speed broadband to enable remote access to work, education, and healthcare industries. Governments around the world are investing in fiber infrastructure to promote economic development and to address the imbalance in broadband access based on geographical factors. For fiber operators, delivering exciting bundled services faster ensures a sustainable competitive advantage.

The subsequent challenges for fiber operators are both numerous and multifaceted. Let us take a glimpse through some of the pressing questions:

- How to roll out networks faster and in a sustainable way?
- How to build a simple, contextual, and automated IT stack to deliver a great experience to customers?
- How to create value in the enterprise market?
- How to ensure that the total cost of ownership (TCO) for business and IT operations remains within budget?

These questions have been the foundation of the philosophy that TCS has employed to design and develop TCS HOBS™ for Fiber Operations and Monetization.

Overview

TCS HOBS for Fiber Operations and Monetization is a plug-and-play IT stack that provides all the business capabilities required to run a fiber business. It can be deployed rapidly using future-ready delivery methodologies. Its modular design aids in adding new capabilities to meet changing demands in the business. We describe this approach as fit-for-purpose and fit-for-growth.

The solution is deployed globally, catering to multiple fiber operators in Europe and Asia. Delivery excellence is fundamental to TCS, and we have a proven history of successfully executing numerous transformation programs.

Solution

TCS HOBS for Fiber Operations and Monetization is cloud-native, TM Forum-certified, and mapped to the Open Digital Architecture (ODA). It comes with OpenAPIs providing seamless integration and enhanced flexibility. It encompasses a comprehensive set of pre-integrated capabilities across business and operational support functions for improved deployment times. The key applications of the platform include CRM, product catalog, order management, billing, inventory, fulfilment, and service assurance.

The TCS approach to transforming or launching fiber business is proven and includes elements such as:

- Pre-integrated yet modular components with ready-to-deploy business processes for Minimum Viable Product (MVP)-based agile delivery.
- TM Forum-certified, cloud-native, and multi-tenant capabilities with OpenAPIs.

- A catalog-driven order architecture that enables seamless ecosystem integration and rapid launch of new products and bundles improving the time to market.
- Robust analytics and reporting engine empower enterprises to deliver context-driven experiences.
- Predictive, prescriptive analytics, and intelligence reduce risk and help make informed decisions, reducing the cost of failure.
- Business SLA-driven engagement model, Scaled Agile (SAFe) way of working with DevOps and continuous delivery and continuous deployment (CI/CD) at the core.
- Flexibility within the commercial model.

Benefits

TCS HOBS helps customers reap the following benefits:

>99% zero-touch activation

>8,000 new product launches

>30% reduction in TCO

New fiber business launch with E2E OSS/BSS in **less than 16 weeks**

>8% sustained revenue growth

The TCS advantage

TCS partners with global customers, driving their growth and digital transformation journeys. We help enterprises become digital-first businesses with:

- **Future-ready business models:** TCS enables enterprises to transform customer experience and drive growth by building truly differentiating capabilities through technology transformation enabled by a Machine First™-approach and cloud-first modernized platforms, business-centric product-based operating model, enterprise-wide adoption of agile, and building ecosystems and new models.
- **Strategy to implementation approach:** At every step of the transformation journey, we assist enterprises with an in-depth understanding of their unique requirements, charting the roadmap, and driving implementation.
- **Seamless experience and delivery accountability:** TCS has extensive expertise and experience delivering complex transformation programs. By working as true partners over the long term, we deliver the most sustainable and successful results.
- **Domain expertise:** By partnering with TCS, you can leverage the experience of technology and domain experts who adhere to industry-leading practices to drive successful business outcomes
